

# ***S-1500***

***Legendary Krell amplifier  
performance in a multi-channel,  
upgradeable new design.***

*Introducing the S-1500  
Multi-channel Power Amplifier.*

*Available in luxurious silver or black anodized finish.*

**KRELL**  
THE LEADER IN AUDIO ENGINEERING

# **KRELL Design Features: S-1500** *Multi-channel Power Amplifier*

## **POWER**

- Rock solid, linear power supply design renders the S-1500 impervious to speaker demand or AC line fluctuations.
- A 1,500 VA toroidal transformer is designed for massive current delivery while maintaining an ultra-low noise profile.
- A robust, 80,000-microfarad array of quick-charging filter capacitance offers enormous energy storage that is available in an instant.
- Surface Mount Technology is utilized in the amplifier channels to achieve the high circuit density required for wide bandwidth performance.
- Krell Current Mode, fully balanced topologies, are utilized for all amplifier channels for the lowest noise and greatest detail retrieval.
- Class-A circuitry is utilized in the input, pre-driver, and driver stages to provide the most accurate signal path.

- Eight high-speed power devices per channel deliver 150 W into 8 Ohms and 300 W into 4 Ohms. The amplifier is stable at any load impedance.

## **CONNECTIONS**

- All channels support balanced inputs and outputs. High quality, 5-way binding posts allow speaker connections via bare wires, spade lugs, or banana plugs.

## **UPGRADES**

- A modular platform provides an upgrade path for the Showcase 5 and Showcase 6 amplifiers, enabling additional channels to be installed at any time. The base platform includes input and speaker connections for 7 channels, making upgrades a simple matter when desired.
