1	Introduction	8
1.1	Training surgeons	8
1.2	Interactive surgery simulation	9
1.3	Overview of thesis	11
2	Preliminaries	15
2.1	Continuum mechanics	16
2.2	Finite Element Method	22
2.3	Linear tetrahedra for hyperelastic materials	26
2.4	Unconstrained optimization	28
2.4.1	Linear Conjugate Gradient method	29
2.4.2	Non-linear conjugate gradients	32
2.4.3	Truncated Newton	32
2.5	Time integration	33
2.6	Mechanics of soft tissue	36
3	Combining FEM and cutting: a first approach	38
3.1	Linear FEM	40
3.2	Cuts	42
3.2.1	Selecting faces	43
3.2.2	Node snapping	46
3.2.3	Degeneracies	46
3.3	Results	50
3.4	Discussion	53
4	Relaxation algorithms	59
4.1	Convergence of dynamic relaxation	59
4.2	Experimental setup	63
4.3	Hyperelastic compressible materials	65
4.3.1	St. Venant-Kirchoff elasticity	67
4.3.2	Linear geometry approximation	67
4.3.3	Neo-Hookean elasticity	68
4.3.4	Veronda-Westmann elasticity	69
4.4	Relaxation algorithms	70

4.4.1	Dynamic parameters	70
4.4.2	Line search	72
4.5	Results	73
4.5.1	Tuning CG	73
4.5.2	Performance	74
4.5.3	Influence of mesh size	74
4.5.4	Linear elasticity	77
4.5.5	Nonlinear material models	77
4.5.6	Influence of mesh quality	79
4.6	Discussion	79
4.7	Conclusion	83
5	A Delaunay approach to interactive cutting in triangulated surfaces	85
5.1	Introduction	85
5.2	Cutting in 2D	87
5.2.1	Delaunay triangulation	88
5.2.2	Cutting and Delaunay flips	89
5.3	Surface cuts in 3D	91
5.3.1	Single incision	92
5.3.2	Multiple incisions	95
5.4	Results	98
5.5	Discussion	98
6	2D needle insertion	104
6.1	Related work	104
6.2	Needle insertion in 3D	105
6.3	Physical model	106
6.3.1	Elasticity	106
6.3.2	Stick-slip friction	108
6.4	Needle representation	109
6.5	Edge bisection	110
6.6	Solution method	114
6.7	Implementation	115
6.8	Computational experiments	115
6.8.1	Test situation	116
6.8.2	Residual tolerance	117
6.8.3	Mesh density	117
6.8.4	Insertion speed	119
6.8.5	Timings	119
6.8.6	Relocation errors	120
6.8.7	Nonlinearity effects	120
6.9	Discussion	122

7	Mesh representation	128
7.1	Abstract oriented simplexes	129
7.2	Representing the mesh	131
7.3	Changing the mesh	135
7.4	Interfacing with mesh connectivity	142
7.5	Discussion	142
8	Conclusions	144
A	Tensor calculus	155
A.1	Tensors	155
A.2	Tensor calculus	157
