

Tornado ADV / F2 / F3 walkways

for 1/32 scale

Some 1/32 modellers do conversions for a Tornado ADV F2 or F3 air defence variant. There were some 1/32 conversion aftermarket sets.

ADV F2 and F3 have some special service markings, walk ways and obviously squadron markings. Aftermarket decal sheets often had no white walk way lines or are out of print.

Custom decal sheets have been designed for the Tornado F2 or F3 in 1/32 scale.

NOTE: the smaller stencilings are to be obtained/used from the mother Tornado kit (Revell or Italeri).

WALKWAYS

The decals sheet has the peculiar white walk way lines in 1/32 seen on grey Tornado ADV F2 and F3. Stripes need to be cut to size by the modeller matching the pattern as shown on the upper view drawing. Some extra lengths are provided. On the sheet are also NO STEPS in white and the alternative NO "foot" STEP symbols as sometimes also seen on ADV Tornado's.

Sheet #1 is essential on all Tornado ADV F2 and F3 schemes.

DECALS SYSTEM

The decal sheet has one continuous print film, so each decal needs to be cut out.

Cutting out long walk way lines can also be done with a sharp knife and steel ruler with an underlying glass plate. But scissors can also be used.

The decal sheet has one continuous print film, so each decal needs to be cut out with fine scissors.

No other prior decal preparation is needed.

Each cut out decal can be applied as usual after soaking it a short while in water. Decals are VERY THIN, so slide off from the wet backing sheet on a horizontally held GLOSSY model surface.
